

FAYE TOZER

ANNOUNCED AS
INMODE UK
AMBASSADOR

InMode UK are excited to announce Faye Tozer (who you may recognise from iconic pop group Steps) as their new brand ambassador!

Faye has been enjoying the benefits of the brands coveted Morpheus8 treatment with top Harley Street Doctor Sach Mohan of Revere Clinic. Morpheus8 is a revolutionary radiofrequency (RF) device (as loved by Faye herself, Kim Kardashian, Amanda Holden - to name just a few of its celeb fans!) that combines targeted RF energy and gold-standard microneedling technology to deliver tightening, rejuvenating and lifting results to the skin non-surgically. She's been really impressed with the results so far, and we can't wait to see her results in person and on the big screen, as Steps prepare to head back on tour in 2021!

Click [here](#) for a sneak peek of Faye's experience trying out InMode's Morpheus8 treatment - and to learn more about her skincare goals.

Faye says, "I'm super excited to be on board with InMode, their technology is amazing and I love the fact that it stimulates the skin to regenerate itself; to produce collagen & elastin, which gets depleted as we age. I've been having the Morpheus8 treatment and am very pleased with the results so far...my skin looks and feels fresher and firmer! I'm looking forward to exploring more of the InMode treatments."

Rosalie Nicholson, Marketing Manager at InMode UK, says of the collaboration, "We are excited to have Faye on board as our Celebrity Ambassador. It goes without saying that she is super talented and gorgeous but also very down-to-earth and relatable to all women out there; aspirational yet accessible at the same time, and this is a powerful combination. She is passionate about the InMode treatments, particularly the Morpheus8 and we look forward to seeing her results and working with her!"
